I'm very happy with the selection of Custom Concrete as our vendor for the placement of our foundations! From start to finish the quality is top notch. Bids are accurate and price competitive. The supervisors take the job from meeting with client on job suggesting proper evaluation to make the job work thru backfill, and turn the job back over to us. The workmen are always polite and easy to work with, for myself, and my clients.

Custom Concrete is also heavily involved with BAGI, always there when our association needs them. I have been building homes for the 34 years and have had experience with many vendors over the years none any better than Custom Concrete!

Thank you,

Bob Sandberg CGB,CGP
